## **Section I. Instructions to Offerors**

### **I.1. Introduction**

Chemonics, the Buyer, acting on behalf of the U.S. Agency for International Development (USAID) and the USAID Developing Sustainable Tourism in Bosnia and Herzegovina (Turizam) (hereinafter referred to as USAID Turizam), under contract number 72016820C00004 is soliciting offers from companies and organizations to submit proposals to participate with USAID Turizam to provide product certification technical support services.

The goal of the USAID Turizam is to accelerate economic growth in the tourism sector, which will lead to more jobs, provide sustainable income for producer organizations and tourism-related companies, help to change the “BiH brand”, and have a positive spill-over effect to other sectors, such as agriculture, transportation, and environmental protection. As part of project activities, USAID Turizam requires provision of technical support services to support USAID Turizam’s efforts to develop a cooperation mechanism to support securing quality standard certifications for BiH agricultural producers and processors as well as handicraft organizations in order to better integrate them in the tourism value chain. This, in turn, will help to increase distribution channels and domestic and export sales.

## **Section II Background, Scope of Work, Deliverables, and Deliverables Schedule**

### **II.1. Background**

USAID's Developing Sustainable Tourism in Bosnia and Herzegovina (TURIZAM) aims to support broad-based, tourism-driven economic growth and promote social harmony by capitalizing on its rich cultural heritage and distinctive nature. In addition, Turizam seeks to support the Bosnia and Herzegovina (BiH) tourism industry to quickly recover from the negative impacts of the COVID-19 pandemic and set it on a robust growth trajectory toward a sustainable tourism economy. The project is built upon four objectives:

- Objective 1: Enabling environment with the harmonized policies and regulations necessary for noticeable growth in the tourism sector established;
- Objective 2: Tourism quality, services, and branding strengthened resulting in improved BiH tourism industry;
- Objective 3: Tourism service providers, agriculture, and other tourism-related SMEs gain improved access to finance resulting in a substantial increase in investment;
- Objective 4: Tourism and local agriculture products gain increased access to regional and global markets.

Bosnia and Herzegovina (BiH) is well-positioned to compete in the burgeoning global tourism industry. BiH has unique layers of history with fascinating heritage and is endowed with one of Europe's most distinguished natural landscapes. Properly conserved, developed with innovation and effectively marketed, sustainable tourism can fuel broad-based economic growth across the tourism and related value chains, including agriculture. Both tourism and the agriculture and food industry are important economic sectors of the economy of BiH, its Entities, and the Brčko District of BiH, from the point of view of contribution to the economy, total employment, and socio-economic development.

### **II.2. Opportunities for achieving distinctive designations for BiH agricultural and handcraft products and processes**

BiH agricultural producers are often small and lack sophisticated production or market access capabilities. In order to sell products to markets and better position producers on both domestic and international markets, implementation of certain quality standards is one of the key requirements. Objective two, among other Turizam project objectives, relates to improved access to the domestic and international markets by ensuring that local products meet relevant quality standards and attain necessary certifications. Turizam will support BiH products to attain registrations and protections such as Protected Denomination of Origin (PDO), Protected Geographical Indication (PGI), Traditional Specialty Guaranteed (TSG)<sup>1</sup>, Certification Marks, as well as the Organic and Halal standards that among others are becoming increasingly important for better integration into the tourism value chain. As part of this effort Turizam will deliver education and technical assistance to build organizations' capacity for introducing and implementing the protected geographic designations and certification marks, Organic standard, and Halal product quality standards. Technical assistance will be provided in a form of direct advisory support to participating organizations and/or individual farmers in order to prepare them for external inspection by a certification body. This will include direct field and online work, trainings, preparation of documents, and other necessary activities.

Geographical indications will add value and can drive the development of agricultural producers and production-based organizations based on available natural resources and BiH's rich tradition. As a marketing tool, geographical indications include a certification and labeling system applied to agricultural

---

<sup>1</sup> Note that PDO, PGI, and TSG are collectively referred as Geographic Indication (GI) marks.

and food products to distinguish them from others and to highlight the added value of their unique local characteristics, history, or traditional features. These are often related to natural factors (such as soil, climate, and water) and human factors (such as local culture, expertise, and tradition).

Certification marks are signs used in both handicrafts and agricultural trade to identify products. They are used to indicate that the products and services comply with the conditions of certification of the authorized institution that issue certification and they are a sign of controlled quality. There are three types of certification marks that can be registered: individual marks, certification marks (such as officially registered trademark, value certification, etc. or local language equivalents such as "žig" and "oznaka"), and common certification marks. An individual mark distinguishes the products and services of one producer organization from another one. However, this does not mean that an individual mark must be owned by one person: individual marks may be owned by one or more legal or physical bodies. A common mark distinguishes the products and services of a group of companies or members of an association from competitors. Common certification marks can be used to build consumer confidence in products or services provided under a common mark. They are very often used to identify products that share a particular feature. Only associations of producers, service providers, or traders and legal persons governed by public law may apply for a common mark.

Organic agriculture is an accessible and empowering system for producers given that its largely based on the use of local biodiversity and resources, but at the same time is also an environmentally friendly standard. In the system of organic production, agricultural producers must apply strict regulations, and their final product must be certified, namely obtain confirmation that it has been produced in compliance with these regulations. Although BiH has natural resources suitable for development of organic production, the number of certified producers is small, and the quantities produced are modest. Organic production refers mainly to fruit, vegetable, medicinal, and aromatic plants and forest products (wild mushrooms, berries, and herbs). Demand for organically certified products is on the rise.

Halal standard refers to food and pharmaceutical industry products that are prepared following Islamic laws and regulations that determine what is allowed (halal) and what is forbidden (haram). Some Muslim consumers demand halal, high quality, and healthy products in conformity with Islamic rules and Halal food certification provides different benefits for producers and consumers. Halal standard in the food sector has been increasing its importance in the global market recently. Producers that obtain halal certification will have the opportunity to supply their products to the domestic and global halal food market and increase their competitive advantage. Halal standard is mostly applied in food and in the production of natural cosmetics and increasingly is becoming important in the tourism value chain. Halal is very important for BiH because, in addition to tourism, it is developing the agriculture sector where there are suppliers of raw materials and services for the tourism sector. Tourism establishments can also obtain halal certification to attract new guests.

It is clear that attainment of PDO, PGI, and TSG require a longer period of time than Organic and Halal standards. Therefore, a phased approach is required. Due to the limited timeframe for this activity, advantage in an early stage of implementation could be given to Halal and Organic certification and/or where the GI or certification marks have advanced the procedure already. In its proposal, the Offeror should consider this when proposing types of certification/organizations under Phase 1.

Implementation of these standards in BiH will improve an organization's overall management, product quality, safety, and access to new domestic and international markets. Differentiation on the market usually allows a better market access and price. Also, quality designations will offer guarantee on the quality and authenticity of the products and offer a wider choice to consumers. Tourists and visitors from all over the world come to the country not only to admire its natural and cultural richness, but also to enjoy the local

gastronomy. Gastronomy tourism helps sustainable tourism concepts, its preservation, and the development of local products.

In BiH in general there is a lack of awareness about the importance of quality standards certification. A large number of organizations throughout the BiH are not aware of the many advantages that can be gained with the implementation of PDO, PGI, TSG, certification marks or organic and halal standards. In addition to the improvements related to product quality, these standards also offer new marketing and sales related opportunities.

Turizam will also design and launch awareness campaigns (combination of PR activities, online conferences, and field workshops) to promote the steps for and benefits from obtaining the quality certificates. Turizam will provide additional support to selected organizations related to improving their graphic design, marketing and promotional practices, and developing market linkages.

### **II.3. Objective**

The objective of this activity is to support securing quality standard certifications for BiH agricultural producers and processors, as well as handicraft organizations, to better integrate them in the tourism value chain. This, in turn, will help them develop distribution channels and increase domestic sales and export. #### Section W Reporting on Subcontractor Data Pursuant to the Requirements of the Federal Funding Accountability and Transparency Act

a) Public Availability of Information.

Pursuant to the requirements of FAR 52.204-10, Chemonics is required to report information regarding its award of subcontracts and sub-task orders under indefinite delivery/indefinite quantity subcontracts to the Federal Funding Accountability and Transparency Act Subaward Reporting System (FSRS). This information will be made publicly available at <http://www.USASpending.gov>.

(b) Subcontractor's Responsibility to Report Identifying Data.

**Within 7 days of an award of a subcontract or sub-task order with a value of \$30,000 or greater unless exempted, the Subcontractor shall report its identifying data required by FAR 52.204-10 (including executive compensation, if applicable) in the required questionnaire and certification found in Section I.6.** If the Subcontractor maintains a record in the System for Award Management ([www.SAM.gov](http://www.SAM.gov)), the Subcontractor shall keep current such registration, including reporting of executive compensation data, as applicable. If reporting of executive compensation is applicable and the Subcontractor does not maintain a record in the System for Award Management, Subcontractor shall

In addition to contractual remedies, Chemonics may make the Subcontractor’s failure to comply with the reporting requirements a part of the Subcontractor’s performance information record.

## **Annex 2      Guide to Creating a Financial Proposal for a Fixed Price Subcontract**

The purpose of this annex is to guide offerors in creating a budget for their cost proposal. Because the subcontract will be funded under a United States government-funded project, it is important that all offerors' budgets conform to this standard format. It is thus strongly recommended that offerors follow the steps described below.

**Under no circumstances may cost information be included in the technical proposal.** No cost information or any prices, whether for deliverables or line items, may be included in the technical proposal. Cost information must only be shown in the cost proposal.

**Step 1:** Design the technical proposal. Offerors should examine the market for the proposed activity and realistically assess how they can meet the needs as described in this RFP, specifically in section II. Offerors should present and describe this assessment in their technical proposals.

**Step 2:** Determine the basic costs associated with each deliverable. Offerors should consider best estimate of the costs associated with each deliverable, which should include labor and all non-labor costs, e.g. other direct costs, such as fringe, allowances, travel and transport, etc.

**Step 3:** Create a budget for the cost proposal. Each offeror must create a budget using a spreadsheet program compatible with MS Excel. The budget period should follow the technical proposal period. A sample budget is shown on the following page. All items and services must be clearly labeled and include the total offered price. The detailed budget must show major line items, including, for example:

1. Salaries
2. Indirect costs
3. Any other costs applicable to the work
4. DBA – see clause I. 11

All cost information must be expressed in BAM.

**Step 4:** Write Budget Narrative. The spreadsheets shall be accompanied by written notes in MS Word that explain each cost line item and the assumption why a cost is being budgeted as well as how the amount is reasonable. Supporting information must be provided in sufficient detail to allow for a complete analysis of each cost element or line item. Chemonics reserves the right to request additional cost information if the evaluation committee has concerns of the reasonableness, realism, or completeness of an offeror's proposed cost.

If it is an offeror's regular practice to budget indirect rates, e.g. overhead, fringe, G&A, administrative, or other rate, Offerors must explain the rates and the rates' base of application in the budget narrative. Chemonics reserves the right to request additional information to substantiate an Offeror's indirect rates.

### Sample Budget

Offerors should revise the budget line items accordingly in response to the technical and cost requirements of this RFP.
